

se:lab tableboard – sit-stand table with whiteboard functionality

se:lab tableboard is a desk which is perfectly adapted to the needs of contemporary office concepts and enables dynamic working. This mobile desk is electrically height-adjustable and equipped with a rechargeable battery so that it can be used independently of a stationary power supply. Special highlight: The table top has a writable surface and can be swivelled vertically. The table can thus be used as a whiteboard in no time at all, or stored without using much space.

se:lab tableboard

- Electric height-adjustment: 715 – 1345 mm
- Table top with writable whiteboard surface
- With castors (lockable)
- Wireless power supply with rechargeable battery (fully charged, the height can be adjusted approx. 50 times)
