

# Tobi-Ishi

TABLES

2022

Edward Barber & Jay Osgerby

## Description

In its ten years of life, the Tobi-Ishi table has become a true icon of international design. In all its variations, it retains the strongly sculptural feel defined by the three elements that compose it, inspired by the “flying stones” that dot the pools of water in Japanese gardens. This peculiar balance of solidity and lightness also appears in the new special edition made of strips of white Carrara and green Alpi marble with a very manual and sophisticated crafting technique, which requires slow and skillful processes, making it precious.

## Technical information

**Top and legs**

marble (matt polyester finish)

**Coupling plate**

stainless steel

**Ferrules**
