

Lazy '05

CHAIRS

2005

Patricia Urquiola

Description

The name recalls relaxation, laziness and rest. The principle the pieces of this range have in common is the chromed steel frame with easy to remove covers with a zipper or Velcro fastening. With high backrest for a rigorous position, lower backrest or in the stool version, they all offer the possibility of combining different fabric tones above and under the seat, with a two-colour effect.

Technical information
