

ophelis sum

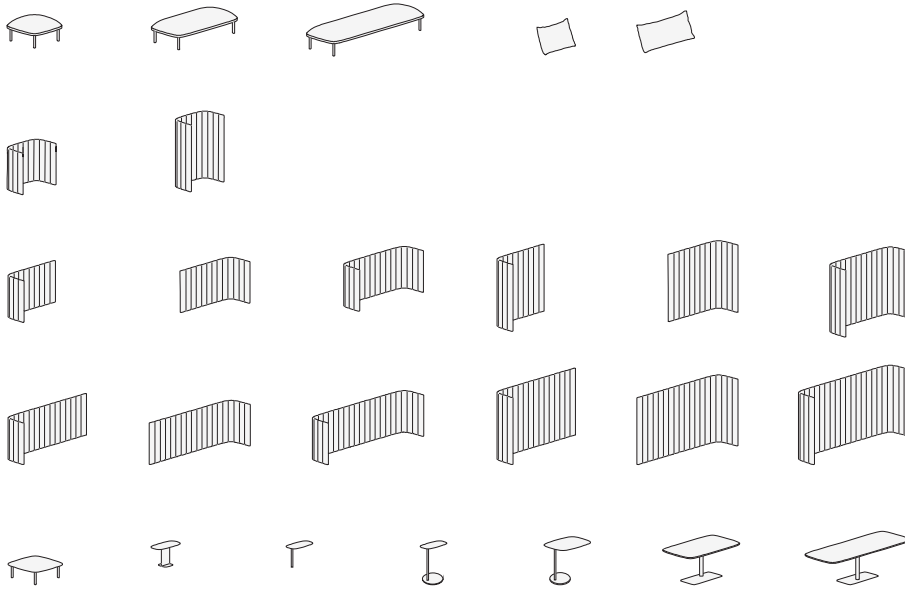

ophelis sum is a modular seating system for configuring islands within a room. The product concept is based on three core elements: base, partition and cushion. These can be combined in an additive and modular fashion. In combination with the seven frame colours and the wide range of fabrics, a large number of seating elements can be combined.

Seating can be arranged along one side only, facing one another or as an L-shaped, T-shaped or X-shaped layout. Versatile cubicles in various sizes can also be configured, thus creating open or enclosed communication areas where teams and project groups can focus on exchanging their ideas. The system is complemented by matching add-on tables that can be fixed to the furniture or placed as free-standing units.

Product features

- Light and flexible seating system for configuring islands within the room
- The product idea is based on three core elements: Base, partition and cushion
- The design vocabulary is clear, modular and additive
- A variety of seating furniture can be easily combined: from simple stools, benches and armchairs to sofas
- Partitions of different heights determine the degree of shielding
- Depending on the extent of retreat and discretion required, partitions can be configured as an L-shape or a U-shape
- Different tables serve as flexible bridges, go-betweens and add-ons
- Integrated power supply options
- Numerous configurations: Seven frame colours and a broad range of textiles
- Seating can be arranged single-sided, facing one another or as L-shaped, T-shaped or X-shaped layouts
- The scope of possible applications ranges from creating islands in the office to furnishing communal areas and domestic living spaces
