LOADS OF WEIGHT

Do not seat on the table.

Maximum recommended weight to load on each model:

EXPLORER 4XS: 40kg - 88 lbs

PACKAGING

The tops are supplied in a wooden box reinforced and protected inside by a cellophane film plus a bubble bag and foam protections. The structure is supplied in a cardboard box reinforced with wood.

CLEANING AND MAINTENANCE

The table should be cleaned with a damp cloth (an organic flannel is recommended) using only water or a mild soap. Do not use solvents, alcohol or any other products containing these derivatives. Make sure the cloth is clean and free of dust and other speckles.

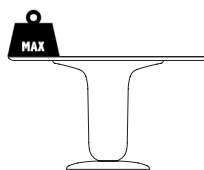

Old and difficult to remove stains:

Treat the dirt with a suitable organic solvent (e.g. acetone, ethyl alcohol, perchloroethylene, Methyl ethyl ketone, etc.). Allow the solvent to act and dry with a paper towel or soft cloth. Rinse and then dry again.

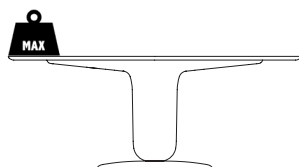

If the stain is still visible, repeat the operations.

*Do NOT place hot objects on the top
