Sponge

Peter Traag

General description:
Created by foaming the polyurethane
directly into the leather upholstery, that is
cut oversize if compared to the final size of
the armchair. During the cooling phase the
cover is adapted to the polyurethane shape,
forming wrinkles that are always different and
grant to the armchair an irregular pattern.

Technical description:
Steel frame.
Padding in polyurethane foam.
Base in integral polyurethane foam.
Not removable cover.
On request, product can be realised also
according to other regulations.
