

Margherita

Jacopo Foggini

General description:

Impressive, important and at the same time visually light, thanks to the polycarbonate. Tall and swiveling, with rounded lines and slender shape. The body, made entirely by hand, rests on a cone-shaped pedestal, enabling the swivel system. Available in four colors: gold, amber and aquamarine blue. Precious like an embroidery. Protective like a nest. Extraordinary for its ability to play with light, assumes different shades and shines when placed near light sources.

Technical description:

Armchair composed of a body in hand-shaped polycarbonate, in gold, amber and aquamarine blue.

The pedestal, in brushed steel in different finishes ruthenium, palladium and gold, enables the swivel system.
