## Athos '12

**TABLES** 

Paolo Piva

## Description

The Athos '12 rectangular table comes in two lengths, in both a fixed and an extensible version, the latter being characterised by an invisible mechanism that allows it to be lengthened so as to accommodate up to twelve people. The V-shaped metal frame supports a thick top softened by rounded edges obtained by means of a complex milling process that enables the wood grain to remain even throughout the entire surface.

## Technical information

veneered wood particles panel **Support frame**drawn steel

Fixed tables frame

steel sheet

**Extensible tables frame** 

anodized aluminium extrusions, plastic material tools

**Ferrules** 

thermoplastic material
